# MTN BOX<sup>®</sup>

At **Montana Colors** we constantly strive to find solutions to fulfil the needs of writers and artists, and this task is only possible through constant attention and interaction with our consumers. In doing so, our development is guided both by the creation of new products and by the improvement of already existing tools. Following this premise, we present to you, the **MTN BOX**.

The plastic crates used for fruit, vegetables or drinks are handy containers that many writers use to comfortably transport their paint. At the same time, the box itself can be used as a stool to sit on or as a step for maximizing your reach when painting.

The **MTN BOX** is a stackable plastic box designed exclusively to transport spray cans and store them in an orderly fashion anywhere; from your home or studio to the trunk of your car. Made in the European Union, its solid, recycled plastic structure is specially designed to support the weight of an average person, allowing you to gain 40 cm in height.

The interior partitions are specially designed to store all sizes of spray cans within the MTN range and can hold between 20 (Mega Colors) and 40 (Water Based 300) spray cans depending on their size. When filling the box with 400 ml spray cans, the remaining space is perfect for adding gloves, caps or any other accessory.

- Minimum capacity: 20 spray cans
- Compatible with all MTN spray cans
- Recycled plastic made in EU
- Color: Black
