SECTION 8 : EXPOSURE CONTROLS/PERSONAL PROTECTION

FORGING EFFECT PAINT BLACK

8.1 CONTROL PARAMETERS:

mtn

If a product contains ingredients with exposure limits, may be necessary a personnel monitoring, work place or biological, to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to EN689, EN14042 and EN482 standard concerning methods for assessing the exposure by inhalation to chemical agents, and exposure to chemical and biological agents. Reference should be also made to national guidance documents for methods for the determination of dangerous substances.

OCCUPATIONAL EXPOSURE LIMIT VALUES (TLV)

AG	GCIH 2013	Year	TLV-TWA		TLV-STEL		Remarks
			ppm	mg/m3	ppm	mg/m3	
Dir	nethyl ether		1000.	1920.		-	Recommended
Ac	etone	1997	500.	1188.	750.	1782.	A4
Ху	lene (mixture of isomers)	1996	100.	434.	150.	651.	A4

TLV - Threshold Limit Value, TWA - Time Weighted Average, STEL - Short Term Exposure Limit. A4 - Non classified as carcinogenic in humans.

BIOLOGICAL LIMIT VALUES:

Notavailable

DERIVED NO-EFFECT LEVEL (DNEL):

Derived no-effect level (DNEL) is a level of exposure that is considered safe, derived from toxicity data according to specific guidances included in REACH. DNEL values may differ from a occupational exposure limit (OEL) for the same chemical. OEL values may come recommended by a particular company, a government regulatory agency or an organization of experts. Although considered protective of health, the OEL values are derived by a process different of REACH.

	DELAYED AND IMMEDIATE EFFECTS AS WELLAS CHRONIC EFFECTS FROM SHORT ANDLONG-TERM EXPOSURE: Routes of exposure: May be absorbed by inhalation of vapour, through the skin and by ingestion. Short-term exposure: Exposure to solvent vapour concentrations in excess of the stated occupational exposure limit, may result in adverse health effects, such as mucous membrane and respiratory system irritation and adverse effects on kidneys, liver and central nervous system. Liquid splashes in the eyes may cause irritation and reversible damage. If swallowed, may cause irritation of the throat; other effects may be the same as described in the exposure to vapours. Long-term or repeated exposure: Repeated or prolonged contact may cause removal of natural fat from the skin, resulting in non-allergic contact dermatitis and absorption through the skin. Repeated exposure may cause skin dryness or cracking. INTERACTIVE EFFECTS: Not available. Not available. ΕΟΤΙΟ	N 13 : DISPOSAL CONSIDERATIONS					
	WASTE TREATMENT METHODS: Directive 2008/98/EC-Regulation (EU) no. 1357/2014: Take all necessary measures to prevent the production of waste whenever possible. Analyse possible methods for revaluation or recycling. Do not discharge into drains or the environment, dispose at an authorised waste collection point. Waste should be handled and disposed in accordance with current local and national regulations. For exposure controls and personal protection measures, see section 8.					

	FORGING EFFECT PAINT BL Code: AE0140117	ACK				
	Disposal of empty containers: Directive 94/62/EC~2005/20/EC, Decision 2000/532/EC~2014/955/EU: Emptied containers and packaging should be disposed in accordance with currently local and national regulations. The classification of packaging as hazardous waste will depend on the degree of empting of the same, being the holder of the residue responsible for their classification, in accordance with Chapter 15 01 of Decision 2000/532/EC, and forwarding to the appropriate final destination. With contaminated containers and packaging, adopt the same measures as for the product in itself. Ensure the container is completely empty before throwing it away. Procedures for neutralising or destroying the product: In accordance with local regulations. Do not incinerate closed containers.

14.5	ENVIRONMENTAL HAZARDS: # Not applicable (not classified as hazardous for the environment).					
14.6	SPECIAL PRECAUTIONS FOR USER: Ensure that persons transporting the product know what to do in case of accident or spill. Always transport in closed containers that are upright and secure. Ensure adequate ventilation.					
14.7	TRANSPORT IN BULK ACCORDING TO ANNEX II OF MARPOL 73/78 AND THE IBC CODE: Not applicable.					
SECTION 15 : REGULATORY INFORMATION						
15.1	EU SAFETY, HEALTH AND ENVIRONMENTAL REGULATIONS/LEGISLATION SPECIFIC: The regulations applicable to this product generally are listed throughout this Safety Data Sheet.					
	Restrictions on manufacture, placing on market and use: See section 1.2					
	Tactile warning of danger: Not applicable (the classification criteria are not met).					
	Child safety protection: Not applicable (the classification criteria are not met).					
	 Specific legislation on aerosols: It is applicable the Directive 75/324/EEC~2013/10/EU, relating to aerosol dispensers and the Directive 87/404/EEC, concerning simple preasure packages 					
	OTHER REGULATIONS:					
	Control of the risks inherent in major accidents (Seveso III): See section 7.2					
	Other local legislations: The receiver should verify the possible existence of local regulations applicable to the chemical.					
15.2	CHEMICAL SAFETY ASSESSMENT: A chemical safety assessment has not been carried out for this mixture.					

SAFETY DATA SHEET (REACH)

beyond our knowledge and control. The product is not to be used for other purposes than those specified, without first obtaining written handling instruction. It is always the responsibility of the user to take all necessary steps in order to fulfil the demand laid down in the local rules and legislation. The information in this Safety Data Sheet is meant as a description of the safety requirements of the product and it is not to be considered as a guarantee of the product's properties.
